

PEF Rod Foam Backer

Control the Seal. Every Time.

- Masons PEF Rod gives you control over sealant depth and joint performance.
- It creates the correct backing so your sealant can flex, seal and last.
- Closed-cell polyethylene.
- Lightweight.
- Easy to install.

MASONS
Designed Smart, Built Tough.

WHERE IT'S USED

- Around windows and doors
- Service penetrations
- Precast and masonry joints
- Anywhere you need controlled sealant depth
- Limits the amount and depth of the sealant applied into the joint.

WHY IT MATTERS

- Stops overfilling joints
- Reduces sealant use
- Allows proper joint movement
- Helps create a reliable air seal
- Prevents sealant blow-through penetrations through walls.
- For use with pre-cast concrete slabs and joints between brick and masonry.

BUILT FOR THE JOB

- Weather resistant
- Closed cell - won't absorb water
- Compressible for a tight fit
- Resistant to most site chemicals
- Non-toxic and odourless
- Supplied in easy-to-use dispenser boxes
- Easily compressible, good expansion
- Wide range of sizes available
